RISK DISCLOSURE STATEMENTS

PART 1 – RISK OF SECURITIES TRADING

1. The prices of securities fluctuate, sometimes dramatically. The price of a security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling securities.
2. Any representation of past performance is not necessarily a guide to future performance.
3. Investments in emerging markets need careful and independent assessment by you of each investment and the risks (including without limitation sovereign risk, issuer risk, price risk, liquidity risk, legal and tax risks). Further, you should be aware that, which such investments can yield high gains, they can also be highly risky as the markets are unpredictable and there may be inadequate regulations and safeguards available to investors.
4. Where investments involve exposure to foreign currencies, changes in rates of exchange may cause the value of the investments to fluctuate up or down.
5. **China Galaxy International Securities (Hong Kong) Co., Limited ('Galaxy International Securities')** and/ or **China Galaxy International Futures (Hong Kong) Co., Limited ('Galaxy International Futures')** is entitled to act upon your instructions and you cannot assume that Galaxy International Securities and/or Galaxy International Futures will warn you if your instructions are ill-timed or inadvisable for any reason or if the instructions are likely to cause you loss.
6. Before you make any investment, you should obtain a clear explanation of all commission, fees and other charges for which you will be liable. These charges will affect your net profit (if any) or increase your loss.

PART 2 – RISK OF MARGIN TRADING

The risk of loss in financing a transaction by deposit of collateral is significant. You may sustain losses in excess of your cash and any other assets deposited as Collateral with Galaxy International Securities / Galaxy International Futures. Market conditions may make it impossible to execute contingent orders, such as 'stop-loss' or "stop-limit" orders. You may be called upon at short notice to make additional margin deposits or interest payments. If the required margin deposits or interest payments are not made within the prescribed time, your Collateral may be liquidated without your consent. Moreover, you will remain liable for any resulting deficit in your Account(s) and interest charged on your Account(s). You should therefore carefully consider whether such a financing arrangement is suitable in light of your own financial position and investment objectives.

PART 3 – RISKS OF PROVIDING AN AUTHORITY TO REPLEDGE YOUR SECURITIES COLLATERAL

There is risk if you provide Galaxy International Securities with an authority that allows Galaxy International Securities to apply your Securities or Collateral pursuant to a securities borrowing and lending agreement, repledge your Collateral for financial accommodation or deposit your Collateral as collateral for the discharge or satisfaction of Galaxy International Securities' settlement obligations and liabilities.

If your Securities or Collateral are received or held by Galaxy International Securities in Hong Kong, the above arrangement is allowed only when you have consented in writing. Your express consent will be/has been obtained in a separate document which will require your signature. Moreover, unless you are a Professional Investor, the authority must specify the period for which it is current and be limited to not more than 12 months. If you are a Professional Investor, these restrictions do not apply.

Additionally your authority may be deemed renewed (i.e. without your written consent) if Galaxy International Securities issues to you a written reminder at least 14 days prior to the expiry of the authority and you do not object to such deemed renewal before the expiry date of your then existing authority.

You are not required by any law to sign these authorities. But an authority may be required by Galaxy International Securities, for example, to facilitate margin lending to you or to allow your Securities or Collateral to be lent to or deposited as collateral with third parties. Prior to your entering into an authority, Galaxy International Securities will explain to you the purposes for which such authority is to be used.

If you sign one of these authorities and your Securities or Collateral are lent to or deposited with third parties, those third parties may have a lien or charge on your Securities or Collateral. Although Galaxy International Securities is responsible to you for Securities or Collateral lent or deposited under the authority, a default by Galaxy International Securities could result in the loss of your Securities or Collateral.

A Securities Cash Account not involving securities borrowing and lending is available. If you do not require margin facilities or do not wish your Securities or Collateral to be lent or pledged, you should not sign the above authorities but should open a Securities Cash Account instead.

PART 4 – RISKS OF TRADING GROWTH ENTERPRISE MARKET STOCKS

Growth Enterprise Market (the “GEM”) stocks involve a high investment risk. In particular, companies may list on the GEM with neither a track record of profitability nor any obligation to forecast future profitability. GEM stocks may be very volatile and illiquid.

You should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of the GEM mean that it is a market more suited to professional and other sophisticated investors.

Current information on the GEM stocks may only be found on the internet website operated by the Stock Exchange. Companies listed on the GEM are usually not required to issue paid announcements in gazetted newspapers.

You should seek independent professional advice if you are uncertain of or have not understood any aspect of this risk disclosure statement or the nature and risks involved in trading of GEM stocks.

PART 5 – RISK OF TRADING NASDAQ-AMEX SECURITIES AT THE STOCK EXCHANGE OF HONG KONG LIMITED

The Securities traded under the Nasdaq-Amex Pilot Program (the “PP”) are aimed at sophisticated investors. You should consult Galaxy International Securities and become familiarised with the PP before trading in the PP securities. You should be aware that the PP securities are not regulated as a primary or secondary listing on the Main Board of the Stock Exchange or the GEM.

PART 6 – RISKS OF FUTURES AND OPTIONS TRADING

This brief statement does not disclose all of the risks and other significant aspects of trading in futures and options. In light of the risks, you should undertake such transactions only if you understand the nature of the contracts (and contractual relationships) into which you are entering and the extent of your exposure to risk. Trading in futures and options is not suitable for many members of the public. You should carefully consider whether trading is appropriate for you in light of your experience, objectives, financial resources and other relevant circumstances.

1. Risks Of Trading Futures And Options

- 1.1 The risk of loss in trading futures contracts or options is substantial. In some circumstances, you may sustain losses in excess of your initial margin funds. Placing contingent orders, such as “stop-loss” or “stop-limit” orders, will not necessarily avoid loss. Market conditions may make it impossible to execute such orders. You may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, your position may be liquidated. You will remain liable for any resulting deficit in your account. You should therefore study and understand futures contracts and options before you trade and carefully consider whether such trading is suitable in light of your own financial position and investment objectives. If you trade options you should inform yourself of exercise and expiration procedures and your rights and obligations upon exercise or expiry.

FUTURES

2. Effect Of “Leverage” Or “Gearing”

- 2.1 Transactions in futures carry a high degree of risk. The amount of initial margin is small relative to the value of the futures contract so that transactions are “leveraged” or “geared”. A relatively small market movement will have a proportionately larger impact on the funds you have deposited or will have to deposit; this may work against you as well as for you. You may sustain a total loss of initial margin funds and any additional funds deposited with **China Galaxy International Futures (Hong Kong) Co., Limited (“Galaxy International Futures”)** to maintain your position. If the market moves against your position or margin levels are increased, you may be called upon to pay substantial additional funds on short notice to maintain your position. If you fail to comply with a request for additional funds within the time prescribed, your position may be liquidated at a loss and you will be liable for any resulting deficit.

3. Risk-Reducing Orders Or Strategies

- 3.1 The placing of certain orders (e.g. “stop-loss” orders, or “stop-limit” orders) which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders. Strategies using combinations of positions, such as “spread” and “straddle” positions may be as risky as taking simply “long” or “short” positions.

OPTIONS

4. Variable Degree Of Risk

- 4.1 Transactions in options carry a high degree of risk. Purchasers and sellers of options should familiarise themselves with the type of option (i.e. put or call) which they contemplate trading and the associated risks.

Warning to option holders

- Some options may be exercised on an expiry day (European- Style Exercise) and other options may be exercised at any time before expiration (American-Style Exercise). Upon exercise, some options require delivery and receipt of the underlying securities, and that other options require a cash payment.
- An option is a wasting asset and there is a possibility that as an option holder you may suffer the loss of the total premium paid for the option. As an option holder, in order to realize a profit it will be necessary to either exercise the option or close the long position

in the market. Under some circumstances, it may be difficult to trade the option due to lack of liquidity in the market. You acknowledge that Galaxy International Securities and/or Galaxy International Futures has no obligation either to exercise a valuable option in the absence of your instruction, or to give you prior notice of the expiration date of the option.

Warning to option writers

- As a writer of an option, you may be required to pay additional margin at any time. You acknowledge that as an option writer, unlike an option holder, you may be liable for unlimited losses based on the rise or fall of the price of the underlying securities and your gain are limited to the option premium.
- Additionally, writers of American-Style Call (Put) options may be required at any time before expiry to deliver (or pay for) the underlying securities to the full value of the strike price multiplied by the number of underlying securities. You recognise that this obligation may be wholly disproportionate to the value of premium received at the time the options were written and may be required at short notice.

You should calculate the extent to which the value of the options must increase for your position to become profitable, taking into account the premium and all transaction costs.

- 4.2 The purchaser of options may offset or exercise the options or allow the options to expire. The exercise of an option results either in a cash settlement or in the purchaser acquiring or delivering the underlying interest. If the option is on a futures contract, the purchaser will acquire a futures position with associated liabilities for margin (see the section on Futures above). If the purchased options expire worthless, you will suffer a total loss of your investment which will consist of the option premium plus transaction costs. If you are contemplating purchasing deep-out-of-the-money options you should be aware that the chance of such options becoming profitable ordinarily is remote.
- 4.3 Selling (“writing or granting”) an option generally entails considerably greater risk than purchasing options. Although the premium received by the seller is fixed, the seller may sustain a loss well in excess of that amount. The seller will be liable for additional margin to maintain the position if the market moves unfavourably. The seller will also be exposed to the risk of the purchaser exercising the option and the seller will be obligated to either settle the option in cash or to acquire or deliver the underlying interest. If the option is on a futures contract, the seller will acquire a position in a futures contract with associated liabilities for margin (see the section on Futures above). If the option is “covered” by the seller holding a corresponding position in the underlying interest or a futures contract or another option, the risk may be reduced. If the option is not covered, the risk of loss can be unlimited.
- 4.4 Certain Exchanges in some jurisdictions permit deferred payment of the option premium, exposing the purchaser to liability for margin payments not exceeding the amount of the premium. The purchaser is still subject to the risk of losing the premium and transaction costs. When the option is exercised or expires, the purchaser is responsible for any unpaid premium outstanding at that time.

ADDITIONAL RISKS COMMON TO FUTURES AND OPTIONS

5. Terms And Conditions Of Contracts

- 5.1 You should ask Galaxy International Securities and/or Galaxy International Futures about the terms and conditions of the specific futures or options which you are trading and associated obligations (e.g. the circumstances under which you may become obliged to make or take delivery of the underlying interest of a futures contract and, in respect of options, expiration dates and restrictions on the time for exercise). Under certain circumstances, the specifications of outstanding contracts (including the exercise price of an option) may be modified by the Exchange or clearing house to reflect changes in the underlying interest.

6. Suspension Or Restriction Of Trading And Pricing Relationships

- 6.1 Market conditions (e.g. illiquidity) and/or the operation of the rules of certain markets (e.g. the suspension of trading in any contract or contract month because of price limits or “circuit breakers”) may increase the risk of loss by making it difficult or impossible to effect transactions or liquidate/offset positions. If you have sold options, this may increase the risk of loss.
- 6.2 Further, normal pricing relationships between the underlying interest and the futures, and the underlying interest and the option may not exist. This can occur when, for example, the futures contract underlying the option is subject to price limits while the option is not. The absence of an underlying reference price may make it difficult to judge “fair value”.

7. Deposited Cash And Property

- 7.1 You should familiarise yourself with the protections given to money or other property you deposit for domestic and foreign transactions, particularly in the event of a firm insolvency or bankruptcy. The extent to which you may recover your money or property may be governed by specific legislation or local rules. In some jurisdictions, property which had been specifically identifiable as your own will be pro-rated in the same manner as cash for purposes of distribution in the event of a shortfall.

8. Commission And Other Charges

- 8.1 Before you begin to trade, you should obtain a clear explanation of all commission, fees and other charges for which you will be liable. These charges will affect your net profit (if any) or increase your loss. By commencing any trading activities with Galaxy International

Securities and/or Galaxy International Futures, you acknowledge that you have been so informed by Galaxy International Securities and/or Galaxy International Futures.

9. Transactions In Other Jurisdictions

9.1 Transactions on markets in other jurisdictions, including markets formally linked to a domestic market, may expose you to additional risk. Such markets may be subject to regulation which may offer different or diminished investor protection. Before you trade you should enquire about any rules relevant to your particular transactions. Your local regulatory authority will be unable to compel the enforcement of the rules of regulatory authorities or markets in other jurisdictions where your transactions have been effected. You should ask Galaxy International Securities and/or Galaxy International Futures about the types of redress available in both your home jurisdiction and other relevant jurisdictions before you start to trade.

10. Currency Risks

10.1 The profit or loss in transaction in foreign currency-denominated contracts (whether they are traded in your own or another jurisdiction) will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.

11. Trading Facilities

11.1 Electronic trading facilities are supported by computer-based component systems for the order-routing, execution, matching, registration or clearing of trades. As with all facilities and systems, they are vulnerable to temporary disruption or failure. Your ability to recover certain losses may be subject to limits on liability imposed by the system provider, the market, the clearing house and/or participant firms. Such limits may vary; you should ask Galaxy International Securities/ Galaxy International Futures for details in this respect.

12. Electronic Trading

12.1 Trading on an electronic trading system may differ from trading on other electronic trading systems. If you undertake transactions on an electronic trading system, you will be exposed to risks associated with the system including the failure of hardware and software. The result of any system failure may be that your order is either not executed according to your instructions or is not executed at all.

13. Off-Exchange Transactions

13.1 In some jurisdictions, and only then in restricted circumstances, firms are permitted to effect off-exchange transactions. Galaxy International Securities and/or Galaxy International Futures may be acting as your counterparty to the transaction. It may be difficult or impossible to liquidate an existing position, to assess the value, to determine a fair price or to assess the exposure to risk. For these reasons, these transactions may involve increased risks. Off-exchange transactions may be less regulated or subject to a separate regulatory regime. Before you undertake such transactions, you should familiarise yourself with applicable rules and attendant risks. (Please also see Part 11 on "Generic Risks Associated with OTC Derivative Transaction")

14. Margin Or Additional Margin Requirements Or Demands For Variation Adjustment

14.1 You agree to provide to and maintain with Galaxy International Securities and/or Galaxy International Futures such margin together with such guarantees and other security in such form and amount and on such terms as Galaxy International Securities and/or Galaxy International Futures may in its absolute discretion require from time to time. Such margin requirements established by Galaxy International Securities and/or Galaxy International Futures may exceed any margin requirements prescribed by any Exchange or Clearing house or broker. Galaxy International Securities and/or Galaxy International Futures may change margin requirement in its sole discretion and at any time without prior to the Client. If Galaxy International Securities and/or Galaxy International Futures determines that additional margin is required, the Client agrees to deposit with Galaxy International Securities and/or Galaxy International Futures such additional margin forthwith upon demand.

14.2 In respect of all futures contracts and/or option contracts entered into by Galaxy International Securities and/or Galaxy International Futures on behalf of the Client, the client shall provide to Galaxy International Securities and/or Galaxy International Futures such margin or additional margin or demands for variation adjustment as Galaxy International Securities and/or Galaxy International Futures may in its absolute discretion require immediately upon demand. Such calls for margin or additional margin requirements or demands for variation adjustment by Galaxy International Securities and/or Galaxy International Futures may exceed the margin requirements or variation adjustments prescribed by Futures Exchange or Clearing House and may be changed by Galaxy International Securities and/or Galaxy International Futures with immediate effect without prior notice to the Client. Galaxy International Securities and/or Galaxy International Futures is obliged to report to the Futures Exchange particulars of all Open Contracts in respect of which the Client has failed on two successive occasions to meet a demand for margin or additional margin or variation adjustments and Galaxy International Securities and/or Galaxy International Futures may close out the Client's Open Contracts in respect of which any demand for margin or additional margin variation adjustments has not been met.

PART 7 – RISK OF PROVIDING AN AUTHORITY TO HOLD MAIL OR TO DIRECT MAIL TO THIRD PARTIES

If you provide Galaxy International Securities and/or Galaxy International Futures with an authority to hold mail or to direct mail to third parties, it is important for you to promptly collect in person all contract notes and statements of your account and review them in detail to ensure that

any anomalies or mistakes can be detected in a timely fashion.

PART 8 – RISK OF CLIENT ASSETS RECEIVED OR HELD OUTSIDE HONG KONG

Client assets received or held by Galaxy International Securities and/or Galaxy International Futures outside Hong Kong are subject to the applicable laws and regulations of the relevant overseas jurisdiction which may be different from the Securities and Futures Ordinance and the rules made thereunder. Consequently, such client assets may not enjoy the same protection as that conferred on client assets received or held in Hong Kong.

PART 9 – RISK OF TRADING EXCHANGE TRADED DERIVATIVES PRODUCTS

DERIVATIVE WARRANTS

Derivative warrants are an instrument that gives an investor the right but not the obligation to “buy” or “sell” an underlying asset at a pre-set price prior to a specified expiry date. At expiry, settlement is usually made in cash rather than a purchase or sale of the underlying asset.

Derivative warrants can be issued over a range of assets, including stocks, stock indices, currencies, commodities, or a basket of securities. They are generally divided into two types: calls and puts. Holders of call warrants have the right, but not obligation, to purchase from the issuer a given amount of the underlying asset at a predetermined price (also known as the exercise price) within a certain time period. Conversely, holders of put warrants have the right, but not obligation, to sell to the issuer a given amount of the underlying asset at a predetermined price within a certain time period.

RISK OF TRADING DERIVATIVES

1. Issuer risk

Derivative warrant holders are unsecured creditors of the issuer and they have no preferential claim to any assets an issuer may hold. Therefore, investors are exposed to credit risk in respect to the issuer.

2. Gearing risk

Although derivative warrants may cost a fraction of the price of the underlying assets, a derivative warrant may change in value more or less rapidly than the underlying assets. In the worst case the value of the derivative warrants falls to zero and holders may lose their entire purchase price.

3. Limited life

Unlike stocks, derivative warrants have an expiry date and therefore a limited life. Unless the derivative warrants are in-the-money, they become worthless at expiration.

4. Time decay

The value of derivative warrants will decrease over time. Therefore, derivative warrants should never be viewed as products that are bought and held as long term investments.

5. Volatility

An increase in the volatility of the underlying asset should lead to a higher warrant price and a decrease in volatility lead to a lower derivative warrant price. Investors should be aware of the underlying assets volatility.

6. Market forces

In addition to the basic factors that determine the theoretical price of a derivative warrant, derivative warrant prices are also affected by the demand for and supply of the derivative warrants. Supply and Demand forces maybe greatest when a derivative warrant issue is almost sold out and when there are further issues of an existing derivative warrant.

7. Turnover

High turnover in a derivative warrant should not be regarded as an indication that its price will go up. The price of a derivative warrant is affected by many factors from market forces to technical matters such as the price of the underlying asset, the volatility of the price of the underlying asset, the time remaining to expiry, interest rates and the expected dividend on the underlying asset.

CALLABLE BULL/BEAR CONTRACTS

Callable Bull/Bear Contracts (“CBBC”) are a type of structured product that tracks the performance of an underlying asset without requiring investors to pay the full price required to own the actual asset. They are issued either as Bull or Bear contracts with a fixed expiry date, allowing investors to take bullish or bearish positions on the underlying asset.

CBBC are issued with the condition that during their lifespan they will be called by the issuers when the price of the underlying asset reaches a level (known as the “Call Price”) specified in the listing document. If the Call Price is reached before expiry, the CBBC will expire early and the trading of that CBBC will be terminated immediately. The specified expiry date from the listing document will no longer be valid.

There are two categories of CBBC, namely Category N CBBC and Category R CBBC. A Category N CBBC refers to a CBBC where its Call Price is equal

to its Strike Price, and the CBBC holder will not receive any cash payment once the price of the underlying asset reaches or goes beyond the Call Price. A Category R CBBC refers to a CBBC where its Call Price is different from its Strike Price, and the CBBC holder may receive a small amount of cash payment (called "Residual Value") upon the occurrence of a Mandatory Call Event ("MCE") but in the worst case, no residual value will be paid.

RISK OF TRADING CALLABLE BULL/BEAR CONTRACTS

1. Mandatory call

A CBBC will be called by the issuer when the price of the underlying asset hits the Call Price and trading in that CBBC will expire early. Payoff for Category N CBBC will be zero when they expire early. When Category R CBBC expire early the holder may receive a small amount of Residual Value payment, but there may be no Residual Value payment in adverse situations. Once the CBBC is called, even though the underlying asset may bounce back in the right direction, the CBBC which has been called will not be revived and investors will not be able to profit from the bounce-back.

2. Gearing effects

Since a CBBC is a leveraged product, the percentage change in the price of a CBBC is greater compared with that of the underlying asset. Investors may suffer higher losses in percentage terms if they expect the price of the underlying asset to move one way but it moves in the opposite direction.

3. Limited life

A CBBC has a limited life, as denoted by the fixed expiry date. The life of a CBBC may be shorter if called before the fixed expiry date. The price of a CBBC fluctuates with the changes in the price of the underlying asset from time to time and may become worthless after expiry and in certain cases, even before the normal expiry if the CBBC has been called early.

4. Movement with underlying asset

Although the price of a CBBC tends to follow closely the price of its underlying asset, but in some situations it may not. Prices of CBBC are affected by a number of factors, including its own demand and supply, funding costs and time to expiry. Moreover, the delta for a particular CBBC may not always be close to one, in particular when the price of the underlying asset is close to the Call Price.

5. Liquidity

Although CBBC have liquidity providers, there is no guarantee that investors will be able to buy/sell CBBC at their target prices any time they wish.

6. Funding costs

The issue price of a CBBC includes funding costs and issuers will specify the formula for calculating the funding costs of their CBBC at launch in the listing documents. Since the funding costs for each CBBC issue may be different as it includes the issuer's financing/stock borrowing costs after adjustment for expected ordinary dividend of the stock plus the issuer's profit margin, investors are advised to compare the funding costs of different issuers for CBBC with similar underlying assets and terms. Funding costs are gradually reduced over time as the CBBC moves towards expiry. The longer the duration of the CBBC, the higher the total funding costs. When a CBBC is called, the CBBC holders (investors) will lose the funding cost for the full period since the funding cost is built into the CBBC price upfront at launch even though with the MCE, the actual period of funding for the CBBC turns out to be shorter.

7. Trading of CBBC close to Call Price

When the underlying asset is trading close to the Call Price, the price of a CBBC may be more volatile with wider spreads and uncertain liquidity. CBBC may be called at any time and trading will terminate as a result. However, the trade inputted by the investor may still be executed and confirmed by the Exchange participants after the MCE since there may be some time lapse between the MCE time and suspension of the CBBC trading. Any trade executed after the MCE will not be recognized and cancelled. Therefore, investors should be aware of the risk and ought to apply special caution when the CBBC is trading close to the call price.

8. CBBC with overseas underlying assets

Investors trading CBBC with overseas underlying assets are exposed to an exchange rate risk as the price and cash settlement amount of the CBBC are converted from a foreign currency into Hong Kong dollars. Exchange rates between currencies are determined by forces of supply and demand in the foreign exchange markets which are affected by various factors. Besides, CBBC issued on overseas underlying assets may be called outside the Exchange's trading hours.

LISTED EQUITY LINKED INSTRUMENTS

Equity Linked Instruments ("ELI") are structured products which can be listed on the Stock Exchange under Chapter 15A of the Rules Governing the Listing of Securities on the Stock Exchange. They are marketed to retail and institutional investors who want to earn a higher interest rate than the rate on an ordinary time deposit and accept the risk of repayment in the form of the underlying shares or losing some or all of their investment. When an investor purchases an ELI, he/ she is indirectly writing an option on the underlying shares. If the market moves as the investor expected, he/ she earns a fixed return from his/ her investment which is derived mainly from the premium received on writing the option. If the market moves against the investor's view, he/she may lose some or all of his/ her investment or receive shares worth less than the initial investment. ELI is traded scripless in Hong Kong dollars and odd lots are settled in cash. Investors should note that short selling of ELI is prohibited. To match their directional view on the underlying securities, investors may choose from three different types of ELI listed on the Stock Exchange: Bull, Bear and Range. Other types of ELI may be traded on the Stock Exchange in future.

RISK OF TRADING LISTED EQUITY LINKED INSTRUMENTS

1. Exposure to equity market

Investors are exposed to price movements in the underlying security and the stock market, the impact of dividends and corporate actions and counterparty risks. Investors must also be prepared to accept the risk of receiving the underlying shares or a payment less than their original investment.

2. Possibilities of losing investment

Investors may lose part or all of their investment if the price of the underlying security moves against their investment view.

3. Price adjustment

Investors should note that any dividend payment on the underlying security may affect its price and the payback of the ELI at expiry due to ex-dividend pricing. Investors should also note that issuers may make adjustments to the ELI due to corporate actions on the underlying security.

4. Interest rates

While most ELI offers a yield that is potentially higher than the interest on fixed deposits and traditional bonds, the return on investment is limited to the potential yield of the ELI.

5. Potential yield

Investors should consult their brokers on fees and charges related to the purchase and sale of ELI and payment/ delivery at expiry. The potential yields disseminated by the Hong Kong Exchanges and Clearing Limited (“HKEx”) have not taken fees and charges into consideration.

EXCHANGE TRADED FUNDS WITH DERIVATIVE NATURE

Exchange Traded Funds (“ETFs”) are passively-managed and open-ended funds. All listed ETFs on the HKEx securities market are authorised by the Securities and Futures Commission as collective investment schemes. They are designed to track the performance of their underlying benchmarks (e.g. an index, a commodity such as gold, etc) and offer investors an efficient way to obtain cost-effective exposure to a wide range of underlying market themes.

ETFs can be broadly grouped into two types: Physical ETFs (i.e. traditional or in-specie ETFs) and Synthetic ETFs. Many of physical ETFs directly buy all the assets needed to replicate the composition and weighting of their benchmark (e.g. constituents of a stock index). Some physical ETFs with underlying equity-based indices may also invest partially in futures and options contracts. Synthetic ETFs do not buy the assets in their benchmark. Instead, they typically invest in financial derivative instruments to replicate the benchmark’s performance.

RISK OF TRADING EXCHANGE TRADED FUNDS

1. Market risk

ETFs are typically designed to track the performance of certain indices, market sectors, or groups of assets such as stocks, bonds, or commodities. ETF managers may use different strategies to achieve this goal, but in general they do not have the discretion to take defensive positions in declining markets. Investors must be prepared to bear the risk of loss and volatility associated with the underlying index/assets.

2. Tracking errors

Tracking errors refer to the disparity in performance between an ETF and its underlying index/ assets. Tracking errors can arise due to factors such as the impact of transaction fees and expenses incurred to the ETF, changes in composition of the underlying index/ assets, and the ETF manager’s replication strategy.

3. Trading at discount or premium

An ETF may be traded at a discount or premium to its Net Asset Value. This price discrepancy is caused by supply and demand factors, and may be particularly likely to emerge during periods of high market volatility and uncertainty. This phenomenon may also be observed for ETFs tracking specific markets or sectors that are subject to direct investment restrictions.

4. Foreign exchange risk

Investors trading ETFs with underlying assets not denominated in Hong Kong dollars are also exposed to exchange rate risk. Currency rate fluctuations can adversely affect the underlying asset value, also affecting the ETF price.

5. Liquidity risk

Securities Market Makers (“SMMs”) are Stock Exchange Participants that provide liquidity to facilitate trading in ETFs. Although most ETFs are supported by one or more SMMs, there is no assurance that active trading will be maintained. In the event that the SMMs default or cease to fulfill their role, investors may not be able to buy or sell the product.

6. Counterparty risk involved in ETFs with different replication strategies

An ETF using a full replication strategy generally aims to invest in all constituent stocks/ assets in the same weightings as its benchmark. ETFs adopting a representative sampling strategy will invest in some, but not all of the relevant constituent stocks/ assets. Where ETFs utilising a synthetic replication strategy use swaps or other derivative instruments to gain exposure to a benchmark, they are exposed to counterparty risk of the swap dealers or the derivative instruments’ issuers and may suffer losses if such dealers or issuers default or fail to honor their contractual commitments.

Even where collateral is obtained by an ETF, it is subject to the collateral provider fulfilling its obligations. There is a further risk that when the right against the collateral is exercised, the market value of the collateral could be substantially less than the amount secured resulting in significant loss to the ETF.

CONVERTIBLE BONDS

Convertible bonds have investment characteristics of both debt and equity securities. A convertible bond gives its holder the right to convert the bond into shares of the issuing corporation according to predetermined terms during a conversion period or at conversion dates.

Convertible bonds have the characteristics of debt securities, such as interest payments and a definite date upon which the principal must be repaid. They also offer possible capital appreciation through the right to convert the bonds into shares at the holder's option according to stipulated terms over certain periods. Due to their conversion feature, convertible bonds usually offer a slightly interest payments than corporate bonds.

RISK OF TRADING CONVERTIBLE BONDS

1. Issuer risk

Issuer may fail to pay interest or principal to bond holders on time.

2. Interest rate risk

The price of fixed rate bonds fluctuates according to changes in market interest rates. Prices for fixed rate bonds move inversely with changes in interest rates. In general, market interest rate movements have a larger impact on the price of bonds with a longer remaining period to maturity.

3. Liquidity risk

Liquidity of some bonds in the secondary market may be low. Investors may find it hard to buy or sell such bonds and need to hold them to maturity.

4. Foreign exchange risk

Exchange rate risk exists if the bond is denominated in foreign currency.

5. Equity risk

If the bond is converted into shares of the issuing corporation, equity risk associated with the stock will be existed.

OTHER MARKET CONDITIONS AND RISKS

As with all investments, returns on derivatives products are influenced by external factors such as inflation and political changes.

Uncollateralised derivative products are not assets backed. In the event of issuer bankruptcy, investors can lose their entire investment, investors should read the listing documents to determine if a product is uncollateralised.

PART 10 – RISK OF TRADING LISTED RENMINBI-DENOMINATED SECURITIES

1. Currency Risk

In general, a non-Mainland (including Hong Kong) investor who holds a local currency other than renminbi will be exposed to currency risk if he/she invests in a renminbi product. This is because renminbi is a restricted currency and subject to exchange controls, you may have to convert the local currency into renminbi when you invest in a renminbi product. When you redeem / sell your investment, you may also need to convert the renminbi received upon redemption / sale of your investment product into the local currency (even if redemptions / sale proceeds are paid in renminbi). During these processes, you will incur currency conversion costs (e.g. as a result of the fluctuations in the exchange rates between the relevant currencies) and you will also be exposed to currency risk. In other words, even if the price of the renminbi product remains the same when you purchase it and when you redeem / sell it, you will still incur a loss when you convert the redemption / sale proceeds into local currency if renminbi has depreciated.

Like any currency, the exchange rate of renminbi may rise or fall. Further, renminbi is subject to conversion restrictions and foreign exchange control mechanism.

2. Liquidity risk

Renminbi products are also subject to liquidity risk as renminbi products are a new type of product and there may not be regular trading or an active secondary market. Therefore you may not be able to sell your investment in the product on a timely basis, or you may have to sell the product at a deep discount to its value. In addition, investors shall also find out whether the renminbi product is subject to any lock-up period or heavy penalty or charges for early surrender or termination of the product.

3. Issuer / counterparty risk

Renminbi products are subject to the credit and insolvency risks of their issuers. You should consider carefully the creditworthiness of the issuers before investing. Furthermore, as a renminbi product may invest in derivative instruments, counterparty risk may also arise as the default by the derivative issuers may adversely affect the performance of the renminbi products and result in substantial losses.

4. Investment / Market risk

Like any investments, renminbi products are subject to investment risk and may not be principal protected i.e. the assets that the products invest in or referenced to may fall as well as rise, resulting in gains or losses to the product.

Depending on the nature of the renminbi product and its investment objective, there may be other risk factors specific to the product which you should consider. Before making an investment decision, always read the risk factors as set out in the offering documents and seek professional advice where necessary.

PART 11 – GENERIC RISKS ASSOCIATED WITH OTC DERIVATIVE TRANSACTIONS

OTC derivative transactions, like other financial transactions, involve a variety of significant risks. The specific risks presented by a particular OTC derivative transaction necessarily depend upon the terms of the transaction and your circumstances. In general, however, all OTC derivative transactions involve some combination of market risk, credit risk, funding risk and operational risk.

- (a) Market risk is the risk that the value of a transaction will be adversely affected by fluctuations in the level or volatility of or correlation or relationship between one or more market prices, rates or indices or other market factors or by illiquidity in the market for the relevant transaction or in a related market.
- (b) Credit risk is the risk that a counterparty will fail to perform its obligations to you when due.
- (c) Funding risk is the risk that, as a result of mismatches or delays in the timing of cash flows due from or to your counterparties in OTC derivative transactions or related hedging, trading, collateral or other transactions, you or your counterparty will not have adequate cash available to fund current obligations.
- (d) Operational risk is the risk of loss to you arising from inadequacies in or failures of your internal systems and controls for monitoring and quantifying the risks and contractual obligations associated with OTC derivative transactions, for recording and valuing OTC derivative and related transactions, or for detecting human error, systems failure or management failure.

There may be other significant risks that you should consider based on the terms of a specific transaction. Highly customized OTC derivative transactions in particular may increase liquidity risk and introduce other significant risk factors of a complex character. Highly leveraged transactions may experience substantial gains or losses in value as a result of relatively small changes in the value or level of an underlying or related market factor.

Because the price and other terms on which you may enter into or terminate an OTC derivative transaction are individually negotiated, these may not represent the best price or terms available to you from other sources.

In evaluating the risks and contractual obligations associated with a particular OTC derivative transaction, you should also consider that an OTC derivative transaction may be modified or terminated only by mutual consent of the original parties and subject to agreement on individually negotiated terms. Accordingly, it may not be possible for you to modify, terminate or offset your obligations or your exposure to the risks associated with a transaction prior to its scheduled termination date.

Similarly, while market makers and dealers generally quote prices or terms for entering into or terminating OTC derivative transactions and provide indicative or mid-market quotations with respect to outstanding OTC derivative transactions, they are generally not contractually obligated to do so. In addition, it may not be possible to obtain indicative or mid-market quotations for an OTC derivative transaction from a market maker or dealer that is not a counterparty to the transaction. Consequently, it may also be difficult for you to establish an independent value for an outstanding OTC derivative transaction. You should not regard your counterparty's provision of a valuation or indicative price at your request as an offer to enter into or terminate the relevant transaction at that value or price, unless the value or price is identified by the counterparty as firm or binding.

The above does not purport to disclose all of the risks and other material considerations associated with over-the-counter ("OTC") derivative transactions. You should not construe this generic disclosure statement as business, legal, tax or accounting advice or as modifying applicable law. You should consult your own business, legal, tax and accounting advisers with respect to proposed OTC derivative transactions and you should refrain from entering into any OTC derivative transaction unless you have fully understood the terms and risks of the transaction, including the extent of your potential risk of loss.

PART 12 – OVERSEAS MARKET RISK

Transactions on market in other jurisdictions may expose you to additional risk. Such overseas markets may be subject to regulation which may offer different or diminished investor protection. Before you trade, you should enquire about any rules relevant to your particular transactions. The Client understands that his local regulatory authority will be unable to compel the enforcement of the rules or regulatory authorities or markets in other jurisdictions where the Client's transactions have been effected.

PART 13 – INTERNET RISK

Since Galaxy International Securities and/or Galaxy International Futures does not control signal power, its reception or routing via internet, configuration of your equipment or reliability of its connection, we cannot be responsible for communication failures, distortions or delays when trading online (via internet). Thus you agree to accept that such prices as Galaxy International Securities and/or Galaxy International Futures may offer from time to time are the best prices then available.

You acknowledge that electronic trading facilities are supported by computer-based component systems for the order-routing, execution, matching, registration or clearing of trades. As with all facilities and systems, they are vulnerable to temporary disruption or failure. You acknowledge that your ability to recover certain losses may be subject to limits on liability imposed by the system provider, the market, the Clearing House and/or particular firms, such limits may vary.

You understand that trading on an electronic trading system may differ from trading on other trading systems. You acknowledge that if you undertake transactions on an electronic system, you will be exposed to risks associated with the system including the failure of hardware and software. The result of any system failure may be that your order is either not executed according to your instructions or is not executed at all.

PART 14 – E-STATEMENT RISK DISCLOSURE STATEMENT

You understand that electronic transmission may be subject to interruption, transmission blackout, delayed transmission due to Internet traffic or incorrect data transmission due to the public nature of the Internet. Due to unpredictable traffic congestion and other reasons, electronic transmission may not be a reliable medium of communication and that such unreliability is beyond the control of Galaxy International Securities and/or Galaxy International Futures.

You understand that communications and personal data may be accessed by unauthorized third parties.

PART 15 – RISK OF UNDERTAKING OTC TRANSACTIONS

You should only undertake OTC Transactions (including but without limitation transactions in relation to pre-IPO securities) if you understand the nature of such trading and such trading facilities and the extent of your exposure to risks. By trading through us with our counterparty (i.e. other authorized brokers), you are exposed to the credit, settlement and other risks of such counterparty to the relevant OTC Transactions. Settlement of the relevant transactions is not guaranteed and you will be responsible for any losses or expenses resulting from your and/or the counterparty's settlement failures.

The transactions in pre-IPO shares executed / trade executed on our counterparty's trading facilities will be cancelled and void if the relevant security subsequently fails to list on the Exchange. Galaxy International Securities and/or Galaxy International Futures is acting as agent for the Client and does not guarantee the settlement of such OTC transactions (including but without limitation transactions in relation to pre-IPO Securities, which trades are done through other authorized broker). Galaxy International Securities and/or Galaxy International Futures are bound by the terms and conditions from time to time agreed with such authorized broker when execute trades for the Client through such authorized broker and no prior notification will be given if there is any change in the terms agreed with such authorized broker.

Furthermore, your order may only be partially executed, or not all, as a result of the lower liquidity in trading through our counterparty as compared to regular market hours of the Exchange. There may also be greater volatility in trading through our counterparty than in regular market hours of the Exchange. The lower liquidity and higher volatility in trading through our counterparty may then result in wider than normal spreads for a particular type of securities.

The prices of securities traded through our counterparty may differ significantly from their opening or traded prices transacted during the regular market hours upon the listing of the securities on the Exchange. The prices by which the counterparty displayed may not reflect the prices in other concurrently operating automated trading systems dealing in the same securities. News announcements made by the issuers may affect the price of their securities after regular market hours. Similarly, important financial information is often announced outside regular market hours. In trading through our counterparty's facilities, these announcements may occur during trading and may cause an exaggerated and unsustainable effect on the price of a particular type of securities.

You should therefore carefully consider whether such trading is appropriate for you in the light of your experience, risk profile and other relevant circumstances and seek independent professional advice if you are in doubt.

Terms used herein shall have the same meanings as those defined in the Terms & Conditions, unless stated herein to the otherwise.

*****Investors should make their own risk assessment and seek independent professional advice where necessary with respect to any exposure to derivative products to ensure that any decision you make is suitable with regards to your circumstances and financial position. In addition, investors should refer to the relevant derivative product's listing documents (including the full text of the risk factors stated therein) in detail before making any investment decision.***

PART I – SUMMARY OF PRESCRIBED LIMITS AND REPORTING LEVEL APPLICABLE TO FUTURES ACCOUNTS OPENED WITH GALAXY INTERNATIONAL FUTURES

Pursuant to the Rules of Futures Exchange, the Securities and Futures (Contracts Limits and Reportable Positions) Rules ("the SFC Rules") made pursuant to Section 35 (1) of the Securities and Futures Ordinance (the "Ordinance") and Guidance Note on Position Limits and Large Open Position Reporting Requirements issued by the SFC ("Guidance Note"), certain prescribed limits and reporting level set by the SFC under the SFC Rules will directly affect your Account(s) – these are summarized below. The Client should note that failure to comply with such limits or to report may constitute a criminal offence under the Ordinance and the Rules.

PRESCRIBED LIMITS

The SFC Rules imposes restrictions on the maximum number of futures contracts, including an option on a contract made under the rules or conventions of a futures market as defined in the Ordinance, for any one contract month or series that may be held or controlled by the Client. The prescribed limits on futures contracts are specified in schedule 1 of the SFC Rules. In general, the prescribed limits in schedule 1 of the SFC Rules are also reflected in the Rules of Futures Exchange. The Client should note that in addition to the prescribed limits, the Futures Exchange may impose other position limits on a particular contract, Galaxy International Futures or the Client where situations warrant such action.

The Client should make reference to the HKEX website for the latest prescribed limits:

https://www.hkex.com.hk/Services/Trading/Derivatives/Overview/Trading-Mechanism/Large-Open-Positions-and-Position-Limits?sc_lang=en

The prescribed limits apply to all positions held or controlled by any person including positions held by the person for his own account and positions belonging to other persons but under the control of such person ("Aggregation Requirements"). A person is regarded as having control of positions as for example where a person is allowed to exercise discretion to trade or dispose of the positions independently without the day-to-day direction of the owner of the positions. The prescribed limits do not apply to a person who controls positions merely by virtue of its corporate relationship (e.g. a parent company in relation to positions held by its affiliates/subsidiaries) provided that such person does not give its affiliates/subsidiaries any day-to-day direction with respect to trading.

EachE of Galaxy International Futures and the Client is prohibited from entering into, holding or controlling more than thethe prescribed limits, unless the excess is expressly authorised by the Futures Exchange oror SFC in accordance with the SFC Rules.

REPORTABLE POSITIONS AND REPORTING LEVEL

The SFC Rules requires a person holding or controlling a reportable position, which is similar to the concept of Large Open Position prescribed in the Rules of Futures Exchange, to notify the recognized exchange company of any reportable position in writing, i.e. the Large Open Position Report ("LOP Report"). The reportable positions for futures contracts are calculated based on the number of contracts held or controlled for a contract month or series and the reporting levels are specified in schedule 1 of the SFC Rules. The Aggregation Requirements as mentioned in the above Prescribed Limits section equally apply to the reportable positions for futures contracts.

The Client should make reference to the HKEX website for the latest reporting levels:

https://www.hkex.com.hk/Services/Trading/Derivatives/Overview/Trading-Mechanism/Large-Open-Positions-and-Position-Limits?sc_lang=en

The Client acknowledges that, if the open positions holding for the Client exceeding 60% of the position limit of stock index futures and options products with the same underlying index, Galaxy International Futures is required to report to Futures Exchange all outstanding positions in the products concerned, including those positions that are below the reporting level.

EachE of Galaxy International Futures and the Client is prohibited from holding or controlling positions more than thethe reporting levels unless

the position held or controlled is reported to the Futures and/or other recognized exchange pursuant to the SFC Rules.

THE FUTURES EXCHANGE'S LARGE OPEN POSITION REPORT PROCEDURES

The Futures Exchange has also set Large Open Position limits in a number of markets operated by the Futures Exchange. In particular, the Client should note that the Client shall itself have direct reporting obligations to the Futures Exchange where the Client holds or controls, in aggregate, open positions equal to or more than the number of futures contracts and/or options contracts specified by Futures Exchange from time to time, whether directly or through the Client's affiliate, and whether through one or more participants of the Futures Exchange, in which event the Client shall be required to file a LOP Report with the Futures Exchange. For the purposes of the Rules of the Futures Exchange, Large Open Position means the number of open futures contracts, including an option on a contract made under the rules or conventions of a futures market as defined in the Ordinance, in a particular futures contract month or option series in a particular market determined by the Board (as defined in the Rules of the Futures Exchange) to be a Large Open Position pursuant to Rules 628 of the Rules of the Futures Exchange. This is similar to the concept of "reportable position" prescribed in the SFC Rules.

RESPONSIBILITIES OF REPORTING AND REPORTING REQUIREMENTS

The prescribed limits and reporting level apply to Galaxy International Futures for its own account and separately and directly to the Client. Clients using more than one participant of the Futures Exchange continue to be subject to the prescribed limits and reporting level. The Client is therefore required to file LOP Report to the Futures Exchange a position which exceeds the prescribed reporting level and the specific positions held through each participant of the Futures Exchange.

The Client holding or controlling a reportable position in the accounts with Galaxy International Futures, can choose to submit the LOP Report to report such reportable position to the Futures Exchange directly (hkfelop@hkex.com.hk) or through Galaxy International Futures. For the avoidance of doubt, where the Client holds or controls a reportable position with more than one participants of the Futures Exchange and notwithstanding that positions separately held by each of these participants of Futures Exchange for the Client may not have exceeded the reporting levels, the Client has direct obligation to ensure LOP Reports are filed to the Futures Exchange such that the total number of positions reported shall represent the total number of positions which are held by the Client. Galaxy International Futures has no obligation to report to the Futures Exchange any positions held or controlled by the Client with other participants of the Futures Exchange.

The LOP Report should be made within ONE reporting day following the day on which the Client first holds or controls the reportable positions and each succeeding day on which the Client continues to hold or control the reportable positions. The Client should submit the LOP Report by using a prescribed form by 12:00 noon on the reporting day. **[A LOP Report template can be downloaded from the HKEX website.]**

The Client hereby acknowledges and agrees to provide Galaxy International Futures immediately upon request of Futures Exchange with any details of transactions/positions in other markets (e.g. OTC market) underlying the reportable positions held by Galaxy International Futures on behalf of the Client. Failure to provide such information to the Futures Exchange could lead to the imposition of position limits other than the prescribed limits according to the Rules of Futures Exchange.

The Client hereby acknowledges the responsibilities of reporting and reporting requirements set out herein, the Rules of Futures Exchange, SFC Rules and Guidance Notes.

The Client is advised to read the Guidance Note on Position Limits and Large Open Position Reporting Requirements issued by the SFC which can be downloaded from the SFC's website at www.sfc.hk.

The Client hereby acknowledges the responsibilities of reporting and reporting requirements set out herein, the Rules of SEHK, Options Trading Rules of SEHK, Operational Trading Procedures of SEHK, SFC Rules and Guidance Notes.

- 6.3. The Client authorises, and the Client has appropriate arrangements in place to authorise, the reproduction, replication and transmission of the stock holding records of the Special Segregated Account at any time for the purpose of enabling SEHK and its subsidiaries to carry out their pre-trade checking procedures.
- 6.4. In the event that:
- (a) the Client instructs Galaxy International Securities to execute an SPSA Order on behalf of the Client and an investor identification number other than the Client's investor identification number is used to execute such order, the Client acknowledges and confirms that Galaxy International Securities may settle such SPSA Order using China Connect Securities from the Special Segregated Account pursuant to the Client's original Instructions; or
 - (b) the Client's investor identification number is used by Galaxy International Securities to execute an SPSA order on behalf of another client of Galaxy International Securities, the Client acknowledges and confirms that Galaxy International Securities may settle such SPSA order using China Connect Securities from the Special Segregated Account of such client pursuant to that client's original Instructions.
- 6.5. The Client represents and undertakes on a continuing basis, including at each time that the Client places an SPSA Order, or otherwise give an Instruction, in respect of the China Connect Securities held in a Special Segregated Account, that in respect of any SPSA Order

which the Client instructs Galaxy International Securities to execute, at all relevant times:

- (a) the Client has been designated such Special Segregated Account and CCASS has assigned the investor identification number to such Special Segregated Account that the Client has provided to Galaxy International Securities in respect to any such SPSA Order, in each case in accordance with the CCASS Rules and any applicable Stock Connect Rules;
- (b) the Client unconditionally authorises Galaxy International Securities to execute the sale of the relevant China Connect Securities in the specified Special Segregated Account on behalf of the Client;
- (c) (A) there are, and will be, sufficient China Connect Securities in the Special Segregated Account for the Client to settle the delivery obligations in respect of such SPSA Order on the settlement day as required under the Stock Connect Rules; and

(B) the Client will ensure that the China Connect Securities that are the subject of the SPSA Order will be delivered to Galaxy International Securities or to the account specified by Galaxy International Securities no later than the cut-off time for delivery as may be specified by Galaxy International Securities from time to time or, if earlier, as may be specified by any relevant Stock Connect Authority, on the settlement day specified by Galaxy International Securities and in compliance with any other requirements for settlement which may be specified by Galaxy International Securities to the Client or the Client's agent for settlement from time to time;
- (d) the total number of China Connect Securities subject to SPSA Orders, in respect of China Connect Securities in that Special Segregated Account on any relevant Trading Day will not exceed the total stock holding position in respect of the same China Connect Security as shown against the investor identification number for the relevant Special Segregated Account (A) immediately before the commencement of operation of Stock Connect on that Trading Day or (B) as at such other time as may be specified by Galaxy International Securities or any relevant Stock Connect Authority from time to time;
- (e) to the extent that (i) the Client is a fund manager and (ii) the Client aggregates SPSA Orders across more than one Special Segregated Account (whether they are maintained with one or more custodian participant registered pursuant to the CCASS Rules),

(A) the Client has authority from all relevant parties (including the relevant funds or sub-funds) so to aggregate such SPSA Orders and allocate China Connect Securities across such Special Segregated Accounts at the Client's discretion; and

(B) any such actions taken or to be taken comply with all Applicable Requirements and do not involve any misappropriation of client assets;
- (f) the relevant number of China Connect Securities recorded in the relevant Special Segregated Account will be used by the Client for stock settlement of such SPSA Order in accordance with the CCASS Rules and any other relevant Stock Connect Rules; and
- (g) to the extent that an SPSA order is a Short Selling order, the borrowed Short Selling Securities are held in the relevant Special Segregated Account and the order is in compliance with (i) the China Connect Rules applicable to any SPSA order and (ii) the obligations set out herein. For the avoidance of doubt, Galaxy International Securities does not accept any Short Selling orders.

6.6. The Client must immediately inform Galaxy International Securities if any of the representations set out above in clause 6.5 are no longer correct or have become misleading or the Client has not complied, or will not comply, with any of the obligations under this Supplement or under the Stock Connect Rules in a way which may affect the ability of Galaxy International Securities to execute an SPSA Order in compliance with the Stock Connect Rules.

6.7. In the event that there is a breach of any of the terms of Clause 6 which results in a failure by Galaxy International Securities to deliver any China Connect Securities held in the relevant Special Segregated Account to CCASS in respect of any SPSA Order as required by the Stock Connect Rules:

- (a) the Client acknowledges that Galaxy International Securities is entitled to inform HKSCC that the failure to deliver was the result of the failure to deliver from a Special Segregated Account and, as a consequence, any overdue short stock position quantities will be deducted from the sellable balances of the relevant Special Segregated Account; and
- (b) the Client agrees to provide any information or any other assistance as may be required by Galaxy International Securities to ensure that SEHK and/or HKSCC is satisfied that the overdue short stock position was a result of a failure to deliver the China Connect Securities from a Special Segregated Account.

7. Settlement, currency conversion and instructions

7.1. Northbound Trading is traded and settled in RMB. If the Client does not have sufficient Offshore RMB in the Account(s) for any purchase order of China Connect Securities through Northbound Trading or other payment obligation in connection with Stock Connect, the Client authorises Galaxy International Securities to convert any funds in another currency in any Account(s) into Offshore RMB for the purposes

of settlement in connection with Stock Connect. However, if there are no such funds (or all or any part of such funds cannot be converted into sufficient Offshore RMB) before any such settlement, settlement may be delayed and/or fail and the Client may not be able to purchase or transfer the relevant China Connect Securities.

- 7.2. Notwithstanding any other provision in the Terms and Conditions, where it is necessary to convert one currency to another pursuant to, in relation to or arising from this Supplement, such currency conversion may be carried out automatically by Galaxy International Securities in good faith at a rate Galaxy International Securities reasonably considers appropriate without prior notice to the Client. The Client indemnifies Galaxy International Securities for any shortfall arising from any such conversion.
- 7.3. The Client waives any of its/his/her right in any jurisdiction to pay any amount other than in the currency in which it is due. If Galaxy International Securities receives an amount in a currency other than that in which it is due:
 - (a) Galaxy International Securities may convert the amount into the due currency on the date and at rates Galaxy International Securities reasonably considers appropriate without prior notice to the Client. Galaxy International Securities may deduct its Costs incurred in the conversion; and
 - (b) the Client satisfies its/his/her obligations to pay in the due currency only to the extent of the amount of the due currency obtained from the conversion after deducting the Costs of the conversion.
- 7.4. The Client must comply with all applicable exchange control laws and requirements in connection with this Supplement and Northbound Trading.
- 7.5. Galaxy International Securities may in its discretion reject the Client's sell order if Galaxy International Securities considers that the Client does not have sufficient available China Connect Securities in the Account(s) by the applicable cut-off time (as notified to the Client by Galaxy International Securities from time to time) or if for any other reason Galaxy International Securities considers that there is or may be non-compliance with any Applicable Requirement. The Client indemnifies Galaxy International Securities for any Loss incurred in connection with any non-compliance or potential non-compliance with pre-trade checking and/or any Applicable Requirement.
- 7.6. Galaxy International Securities may reject the Client's purchase order or sell order upon a request from SEHK, a China Connect Market Operator, or other Stock Connect Authorities. Galaxy International Securities is not liable for any Loss incurred by the Client in connection with any such request from SEHK, the China Connect Market Operator, or other Stock Connect Authorities.
- 7.7. If Galaxy International Securities is unable to effect an order cancellation request received from the Client due to the occurrence of a contingency (such as a breakdown or failure of all communication links between SEHK and a China Connect Market Operator), the Client shall remain liable for its/his/her settlement obligations if the relevant order has already been matched and executed.
- 7.8. Galaxy International Securities is not liable for any Loss incurred by the Client in connection with any trading based on the Client's Instructions. Galaxy International Securities is not able to unwind any trade, and the Client should also take note of the settlement arrangements in respect of China Connect Securities under Stock Connect, the pre-trade checking requirement and the restriction on day (turnaround) trading which may affect the Client's ability to mitigate the consequences of its/his/her own error trades.

8. Authority to sell

- 8.1. The Client authorises Galaxy International Securities to sell or arrange for the sale of any quantity of China Connect Securities held on the Client's behalf at such price and on such terms as Galaxy International Securities may determine in its absolute discretion if:
 - (a) Galaxy International Securities receives an instruction directly or indirectly from a China Connect Market Operator or other Stock Connect Authority requiring the Client to sell and liquidate any specified China Connect Securities;
 - (b) Galaxy International Securities is of the view that the Client is in breach or may be in breach of any Applicable Requirements; or
 - (c) Galaxy International Securities has held on the Client's behalf such China Connect Securities for a period longer than Galaxy International Securities' prescribed period as notified to the Client from time to time.

9. Limitation of liability and indemnity

- 9.1. Unless an Applicable Requirement prohibits Galaxy International Securities from excluding or limiting its liability or where the Loss is directly caused by Galaxy International Securities' gross negligence, fraud or wilful misconduct, Galaxy International Securities is not liable for any Loss incurred in connection with this Supplement or any Northbound Trading (including in connection with the provision, unavailability or improper functioning of any Stock Connect related services, delay or error in the transmission of any electronic payment transfer, failure or delay in the execution of any Instruction, breakdown or failure of any communications system, delay in providing funds to the Client, or any other thing Galaxy International Securities does or does not do). This applies where the Loss arises for any reason and even if the Loss was reasonably foreseeable or Galaxy International Securities had been advised of the possibility of the Loss.

- 9.2. To the maximum extent permitted by the Applicable Requirements, the Client indemnifies Galaxy International Securities against, and must pay Galaxy International Securities on demand for, any Loss Galaxy International Securities reasonably incurs in connection with all proceedings and/or Taxes howsoever arising, directly or indirectly, out of or resulting from the Client's trading of China Connect Securities pursuant to Stock Connect.
- 9.3. For the avoidance of doubt, this Clause 9 is in addition to Clause 13 (Indemnity) under Part B of the Terms and Conditions and any other exclusions or limitations of Galaxy International Securities' liability and indemnities set out in this Supplement, the Terms and Conditions, or otherwise.

10. Miscellaneous

- 10.1. The Client agrees to execute any further documents and provide any materials and/or information as Galaxy International Securities may reasonably request to enable Galaxy International Securities to perform its duties and obligations under this Supplement which may become necessary as and when the Stock Connect Rules are updated, amended and/or replaced from time to time. The Client's failure to comply with this provision may result in a suspension of Stock Connect services to the Client.
- 10.2. Without prejudice to the Terms and Conditions, the Client acknowledges that Galaxy International Securities may use any such materials and/or information received from the Client for compliance with the Applicable Requirements and may retain any such materials and/or information received from the Client for such period as it deems appropriate pursuant to the Applicable Requirements.
- 10.3. Galaxy International Securities reserves the right to vary any of the terms of this Supplement by written notice to the Client in accordance with Clause 14 (Termination) under Part B of the Terms and Conditions.
- 10.4. Save for Clause 9 above, this Supplement automatically terminates upon the termination of the Terms and Conditions.

- (a) no day trading is allowed (i.e. China Connect Securities purchased on a Trading Day shall not be sold on the same day);
 - (b) unless an SPSA Order arrangement is in place, pre-trade checking is in place so that the Client must have its/his/her China Connect Securities transferred to Galaxy International Securities' corresponding CCASS account before trading commences on a Trading Day if it/he/she intends to sell those China Connect Securities during that Trading Day;

- (h) Galaxy International Securities may not be able to send in a Client’s request to cancel an order in case of contingency, such as when HKEx loses all its communication lines with a China Connect Market Operator, and the Client should still be liable for the settlement obligations if the orders are matched and executed;
- (i) the Client must comply with the Operator Rules and other applicable laws of Mainland China relating to Northbound Trading;

The Client shall authorise and fully cooperate with Galaxy International Securities to provide such information and materials;

- (o) HKEx and its subsidiaries, the China Connect Market Operators and their subsidiaries, and any Stock Connect Authorities and their respective directors, employees and agents shall not be responsible or held liable for any losses or damages directly or indirectly incurred by the Client or any third parties arising from or in connection with Northbound Trading, or arising from or in connection with the China Connect Market Operator making, amending or enforcing the relevant Operator Rules, or any action taken by it in the discharge of its supervisory functions or regulatory obligations; and
- (p) the imposition of a Circuit Breaker by a China Connect Market Operator on any trading day of the relevant China Connect Market will result in suspension of trade execution on the relevant China Connect Market.

11.6. The Client acknowledges and accepts that:

- (a) this Supplement does not purport to disclose all the risks or other material considerations in connection with Northbound Trading or securities transactions in general;
- (b) this Supplement does not modify any Applicable Requirements (except to the extent set out in this Supplement and permitted under the Applicable Requirements);
- (c) SEHK has the power not to extend any service relating to trading China Connect Securities through Stock Connect to the Client and the power to require Galaxy International Securities not to accept Instructions from the Client if it is found that the Client, Galaxy International Securities and/or any of Galaxy International Securities’ clients has or may have committed any abnormal trading conduct set out in the Stock Connect Rules or failed to comply with any Stock Connect Rules;

12. Investor ID model for Northbound Trading

- 12.1. This Clause 12 applies at any time that the Client trades China Connect Securities under Stock Connect through Galaxy International Securities from the Investor ID Model Effective Date.
- 12.2. The Client agrees to provide the updated Client Identification Data to Galaxy International Securities. If there are any changes to the CID after its provision, the Client shall inform Galaxy International Securities as soon as possible.
- 12.3. The Client acknowledges that a BCAN will be assigned to it to map its CID by Galaxy International Securities. If the Client holds any joint account with any other Client of Galaxy International Securities, the Client acknowledges that Galaxy International Securities will assign a separate BCAN to such joint account, and the CID of both the Client and the joint holder(s) should be provided under the BCAN for such joint account.
- 12.4. The Client represents and undertakes on a continuing basis, including at each time that the Client places an order, or otherwise gives an Instruction, in respect of the China Connect Securities, that the CID provided to Galaxy International Securities is accurate and up-to-date.
- 12.5. The Client authorises and consents, and the Client has appropriate arrangements in place to authorise and consent,

 - (c) If the CID and BCAN mapping information fails to pass the relevant validation check by SEHK, the China Connect Market Operator or other Stock Connect Authorities, all the trade orders of the Client will be rejected;
 - (d) If the Client is an individual, and does not provide the necessary consents and authorizations (both written and prescribed) in relation to the collection, storage, use, disclosure and transfer of his or her CID and/or BCAN, or the Client's BCAN or BCAN-CID mapping are otherwise invalid or deficient, Galaxy International Securities may, in its own discretion, place Northbound Trading sell orders on behalf of the Client in relation to such BCAN, but no Northbound Trading buy order is allowed in relation to such BCAN;
 - (e) If the Client is an individual, and does not provide the necessary consents and authorizations (both written and prescribed) in relation to the collection, storage, use, disclosure and transfer of his or her CID and/or BCAN, Galaxy International Securities may,

- (A) request the Client to confirm that he/she has not otherwise provided such consent to other brokers for Northbound Trading;
- (B) conduct appropriate due diligence on the Client to ensure that he/she is not abusing the Northbound Trading sell order exception in paragraph (d) above, and the Client agrees to cooperate with any due diligence; or
- (C) refuse to place any further Northbound Trading orders for the Client until the Client provides the necessary consents or authorizations; and
- (f) If abnormal trading activities are identified in respect of the Client by the China Connect Market Operators (via CID and BCAN), the China Connect Market Operators may in its discretion suspend trading by the Client or take such other actions as permitted by Stock Connect Rules, any applicable regulations and laws against the Client.

12.7. In connection with clauses 12.5 and 12.6 above, the Client agrees and acknowledges that:

- (a) If the CID and BCAN mapping information fails to pass the relevant validation check by SEHK, the China Connect Market Operator or other Stock Connect Authorities, or SEHK, the China Connect Market Operator or other Stock Connect Authorities rejects the Client's Northbound Trading orders due to such failure or any other reason:
 - (A) Galaxy International Securities has no obligation, liability or whatsoever, to provide any explanation or reason for such failure or rejection to the Client; and
 - (B) subject to the Applicable Requirements or notification from the SEHK, the China Connect Market Operator or other Stock Connect Authorities, Galaxy International Securities may deliver the failure or rejection message to the Client or follow up with the Client in relation to such failure or rejection in such manner and at such time as it deems appropriate;
- (b) Galaxy International Securities is not liable for any Loss incurred by the Client in connection with any such actions taken by SEHK, the China Connect Market Operator, or other Stock Connect Authorities;
- (c) Galaxy International Securities is not liable for any Loss incurred in connection with this Supplement or any Northbound Trading with respect to any force majeure, the provision, unavailability, technical error or improper functioning of any Stock Connect related services, delay or error in the transmission of any information (including the BCAN and/or CID), failure or delay in the execution of any Instruction, breakdown or failure of any communications system or payment system; and
- (d) The Client indemnifies Galaxy International Securities for any Loss incurred in connection with any non-compliance or potential non-compliance with any Applicable Requirements.

- (c) The Client shall include related or similar acknowledgements and statements contained herein into its Stock Connect business terms with its clients, in particular, in regard of paragraph (b) above, the Client shall obtain the relevant authorizations and consents from its clients, including but not limited to, the authorizations and consents set out in Clause 12.5 and 12.6 above.

Appendix 2 – Stock Connect Risk Disclosure and other information

Unless otherwise defined below, terms defined in the Terms and Conditions of Account Opening Agreement (“Terms and Conditions”) and Appendix 1 shall have the same meaning in this Appendix.

This Appendix describes some of the key risk factors concerning Stock Connect based on Galaxy International Securities’ current understanding of the Applicable Requirements and the Mainland China stock market. Galaxy International Securities has not verified the accuracy of the Mainland China stock market requirements or rules. This Appendix is not exhaustive and does not disclose all the risks and other significant aspects of Northbound Trading. The Client should ensure that it/he/she understands the nature of Stock Connect and it/he/she should consider carefully (and consult its/his/her own advisers where necessary) whether trading in China Connect Securities is suitable for the Client in light of its/his/her circumstances. It is the Client’s decision to trade in China Connect Securities, but the Client should not trade in China Connect Securities unless it/he/she fully understands and is willing to assume the risks associated with Stock Connect.

Galaxy International Securities does not represent that the information set out in this Appendix is up-to-date or complete, nor does Galaxy International Securities undertake to update it from time to time. For further information, please refer to the materials published on the HKEX website, the SFC website, the SSE website and/or the SZSE website applicable to Stock Connect from time to time and other relevant sources. If in doubt, the Client should seek professional advice.

13. Pre-trade checking and enhanced pre-trade checking

Under the Mainland China law, a China Connect Market Operator may reject a sell order if an investor does not have sufficient available China Connect Securities in its account. In respect of a sell order of China Connect Securities that is not an SPSA order, SEHK will apply similar checking on all sell orders of Northbound Trading at the exchange participant level to ensure there is no overselling by any individual exchange participant (“Pre-Trade Checking”). Enhanced pre-trade checking applies in respect of an SPSA order (“Enhanced Pre-Trade Checking”).

Accordingly, the Client may be unable to execute Northbound sell orders due to Pre-Trade Checking (in respect of sell order that is not an SPSA order) or Enhanced Pre-Trade Checking (in respect of sell order that is an SPSA order) related requirements.

The Client may be unable to execute a sell order of China Connect Securities if:

- (a) (in respect of a sell order that is not an SPSA order) there has been a delay or failure for whatever reason in the transfer of the relevant China Connect Securities to Galaxy International Securities’ designated clearing account(s); or
- (b) (in respect of sell order that is an SPSA order) Galaxy International Securities considers that the Client does not (by the commencement of trading on the Trading Day on which the Client wishes to execute a sell order or any other cut-off time specified by Galaxy International Securities from time to time) hold sufficient available China Connect Securities in a relevant Special Segregated Account to cover a proposed SPSA order; and/or the required number of China Connect Securities will not be delivered from the Special Segregated Account as required by Galaxy International Securities on a settlement day to fulfil an SPSA order; or
- (c) if for any other reason Galaxy International Securities considers that there is or may be non-compliance with any Applicable Requirements.

Any risk, loss or cost resulting from non-compliance or potential non-compliance with Pre-Trade Checking (in respect of sell order that is not an SPSA order) or Enhanced Pre-Trade Checking (in respect of sell order that is an SPSA order), and/or the relevant Applicable Requirements shall be borne by the Client.

14. SPSA Orders – delivery versus payment

Notwithstanding that a delivery versus payment mechanism may be offered by SEHK or CCASS for SPSA orders, unless Galaxy International Securities agrees to pre-fund, freely transferable funds may only be credited by the relevant clearing bank to the Client’s account with the custodian or settlement agent, as applicable, in accordance with the CCASS operations and procedures after the settlement day upon which the delivery obligations in respect of such SPSA orders are required to be settled. Any risk, liability, loss, cost or expense resulting from this delay shall be borne by the Client.

15. Settlement arrangements

Northbound Trading follows the settlement cycle of A shares listed on the relevant China Connect Market. For settlement of China Connect Securities trades, ChinaClear will debit or credit the securities accounts of its participants (including HKSCC as clearing participant) on the Trading Day on which the order is made (“T day”) free of payment. Galaxy International Securities may have settlement arrangements in place that are different from the ChinaClear settlement arrangements. Unless Galaxy International

Securities agrees to prefund, settlement of funds relating to such trading will be effected on the Trading Day following T day ("T+1 day").

16. Quota on Northbound Trading

Relevant governmental or regulatory bodies may impose quotas on the trading of China Connect Securities from time to time depending on market conditions and readiness, the level of cross-boundary fund flows, stability of the markets and other factors and considerations. The Client should read the relevant details on such quota restrictions, including the quota limit, level of quota utilisation, balance of available quota and the applicable restrictions and arrangements published on the SEHK website from time to time to ensure it/he/she has the most updated information. Purchases of China Connect Securities through Stock Connect are currently subject to certain quota controls as detailed below. SEHK has absolute discretion to take all such actions, steps or measures as it considers necessary or appropriate to ensure or facilitate compliance with the relevant quota requirements or restrictions including, without limitation, the following:

- (a) restricting or rejecting buy orders for Northbound Trading;
- (b) suspending or restricting the access to or the use of all or any part of the trading services for Northbound Trading; and
- (c) amending the operational hours and related arrangements of Northbound Trading.

As a result, there is no assurance that a buy order for Northbound Trading can be successfully placed through Stock Connect. The daily quota caps the net buy value of cross-boundary trades under Stock Connect on each Trading Day ("Daily Quota"). The Daily Quota may change from time to time without prior notice and the Client should refer to the HKEx website and other information published by HKEx for up-to-date information.

Under the Stock Connect Rules, investors may sell their China Connect Securities regardless of whether there is a breach of the Daily Quota. If there is a suspension of buying China Connect Securities through Northbound Trading as a result of a breach of the Daily Quota, Galaxy International Securities will be unable to carry out any buy orders and any Instruction to buy submitted but not yet executed will be rejected. Please note that buy orders already accepted will not be affected by the Daily Quota being used up and will remain on the order book of the relevant China Connect Market Operator unless otherwise cancelled by the relevant exchange participants.

17. Restriction on day trading

Unless the SEHK otherwise determines, day (turnaround) trading is not permitted on the A share market in Mainland China. If the Client buys China Connect Securities on T day, it/he/she may only be able to sell such shares on or after T+1 day and as a result, the Client will be exposed to the market risk of holding such shares from T day to T+1 day. Due to the Pre-Trade Checking requirements, if the Client sends to Galaxy International Securities Instructions to sell the China Connect Securities the Client bought on T day, Galaxy International Securities can only accept such Instructions on or after the applicable cut-off time (as notified to the Client by Galaxy International Securities from time to time) on T+1 day.

18. Trading methods and insider trading implications

Trading in China Connect Securities in Mainland China currently involves the use of fax machines for placing orders and orders must be transmitted by 7.30am (Mainland China time) on the morning of the desired trade. Information about the Client's trade may be accessed and utilized by persons privy to the information to trade for their own benefit. Further, the trading arrangements may not be supported by technological checks and balances, resulting in a risk of human error and/or malfeasance.

19. Client errors

Neither Galaxy International Securities nor China Galaxy International shall be liable for any loss, damage or expense or consequential loss, damage or expense suffered by the Client as a result of any trading based on the Client's Instructions. Galaxy International Securities will not be able to unwind any trade, and the Client should take note of the settlement arrangements in respect of China Connect Securities under Stock Connect, including but not limited to quota restrictions which may affect the ability to mitigate the consequences of any error trades.

There is a general prohibition on off-exchange trading or transfers under the Stock Connect Rules, subject to certain exceptions (such as transfers effected to rectify error trades between an exchange participant and its clients in limited circumstances). Currently, there are no detailed rules or guidelines on permissible off-exchange transfers. In addition, SEHK may also suspend the right of a particular exchange participant to conduct non-trade transfers for error trade rectification if SEHK has reasonable cause to suspect or to believe that the exchange participant may abuse or may have abused such rectification arrangements or may have used such rectification arrangements to circumvent the prohibition against off-exchange trades or transfers. Galaxy International Securities is not obliged to effect any off-exchange transfer for rectification of error trades but has absolute discretion to determine whether to conduct such off-exchange transfer. Neither Galaxy International Securities nor China Galaxy International is liable for any losses which may result

directly or indirectly from any error trade or any refusal to conduct a transfer to rectify an error trade.

20. Disclosure of interests

Under Mainland Chinese requirements, if the Client holds or controls shares in a Mainland Chinese company which is listed on a Mainland Chinese stock exchange (a "Mainland Chinese Listco") up to a certain threshold as may be specified from time to time by a relevant Stock Connect Authority, the Client must disclose such interest within the period specified by the relevant Stock Connect Authority, and the Client must not buy or sell any such shares within the period specified by the relevant Stock Connect Authority. The Client must also disclose any substantial change in its/his/her holding as required by the relevant Stock Connect Authority. It is the Client's responsibility to comply with any disclosure of interest rules from time to time imposed by the relevant Stock Connect Authorities and arrange for any relevant filings.

21. Short swing profit rule

Under Mainland Chinese requirements, the "short swing profit rule" requires a person to give up or return any profits made from purchases and sales in respect of China Connect Securities of a Mainland Chinese Listco if: (a) such person's shareholding in the Mainland Chinese Listco exceeds the threshold prescribed by the relevant Stock Connect Authority from time to time; and (b) the corresponding sale transaction occurs within the six months after a purchase transaction, or vice versa. The Client (and the Client alone) is responsible for complying with the Mainland Chinese's rules applicable to the "short swing profit rule".

22. Foreign ownership limits

Under Mainland Chinese requirements, there is a limit as to how many shares a single foreign investor is permitted to hold in a single Mainland Chinese Listco, and also a limit as to the maximum combined holdings of all foreign investors in a single Mainland Chinese Listco. Such foreign ownership limits may be applied on an aggregate basis (i.e. across both domestically and overseas issued shares of the same listed company, whether the relevant holdings are through Northbound Trading, qualified foreign institutional investor/RMB qualified foreign institutional investor regime or other investment channels). Where the aggregated foreign ownership of a single Mainland Chinese Listco reaches a designated percentage, HKEx (or its relevant subsidiary) will suspend accepting any purchase order of the relevant China Connect Securities through Stock Connect until the percentage of foreign ownership of such Listco is reduced to a certain level.

It is the Client's responsibility to comply with all foreign ownership limits from time to time imposed by Applicable Requirements. The Client may also be required to report to the relevant authorities when a designated percentage of ownership is reached. If Galaxy International Securities becomes aware that the Client has breached (or reasonably believe that the Client may breach upon execution of further buy orders) any foreign ownership limits, or if Galaxy International Securities is so required by any Stock Connect Authority (including without limitation to, as a result of a forced-sale notice issued by a China Connect Market Operator), the Client authorises Galaxy International Securities to sell any China Connect Securities in order to ensure compliance with all Applicable Requirements. However, Galaxy International Securities is not obliged to do so and the Client should not rely on such action by Galaxy International Securities to ensure the Client's compliance with any Applicable Requirements.

23. China Connect Securities eligible for Northbound Trading

SEHK will include and exclude securities as China Connect Securities based on the prescribed criteria under the Stock Connect Rules. The Client will only be allowed to sell a China Connect Security and be restricted from further buying, if (i) the China Connect Security subsequently ceases to be a constituent stock of the relevant indices, and/or (ii) the China Connect Security subsequently moves to the risk alert board, and/or (iii) the corresponding H share of the China Connect Security subsequently ceases to be traded on SEHK, and/or (iv) other criteria prescribed in SSE China Connect Rules and SZSE China Connect Rules.

According to the Operator Listing Rules, if any China Connect Market-listed company is in the delisting process, or its operation is unstable due to financial or other reasons such that there is a risk of being delisted or exposing investors' interest to undue damage, the China Connect Market-listed company will be earmarked and traded on the risk alert board. Any change to the risk alert board may occur without prior notice. For details concerning the risk alert board, please refer to the Operator Listing Rules and the provisional trading arrangement on the risk alert board of China Connect Market Operator.

24. No off-exchange transfers

Galaxy International Securities and China Galaxy International may not provide any off-exchange services relating to the transfer in any China Connect Securities otherwise than through the Stock Connect, unless otherwise provided by a Stock Connect Authority (such as post-trade allocation of shares by a fund manager across the funds and/or sub-funds it manages, stock borrowing and lending of China Connect Securities which are eligible for covered short selling and with a tenor of no more than one month and any other situations specified by the China Connect Market Operator and ChinaClear).

25. Offshore RMB exchange rate risks

Similar to other foreign currencies, the exchange rate of Offshore RMB may rise or fall. There is no guarantee that RMB will not depreciate. The exchange rate of Offshore RMB will be affected by, amongst other things, foreign exchange control imposed by the Mainland Chinese central government from time to time (for example, there are currently restrictions on the conversion of RMB into other currencies). The exchange rate of Offshore RMB may fluctuate as a result of market conditions and economic factors.

In addition, RMB is currently subject to foreign exchange control and restrictions by the Mainland China central government. There is currently a limited pool of RMB outside Mainland China. Should the Mainland China central government tighten its foreign exchange control over the cross-border movements between onshore RMB and Offshore RMB, the liquidity in RMB is likely to be adversely affected.

If RMB is not the Client's home currency, the Client may have to convert its/his/her home currency into RMB when investing in China Connect Securities and vice versa for any payments in RMB from transactions under the China Connect Securities. The Client will be incurring currency conversion costs (being the spread between buying and selling of Offshore RMB) and subject to exchange rate fluctuation risks in any such currency conversion, which may adversely affect the market value of China Connect Securities.

26. Placing orders

Galaxy International Securities only accepts orders for Northbound Trading that comply with the Applicable Requirements. Currently, only limit orders with a specified price are allowed for China Connect Securities pursuant to the Applicable Requirements, whereby buy orders may be executed at or lower than the specified price and sell orders may be executed at or higher than the specified price. Market orders will not be accepted.

27. Price limits for China Connect Securities

China Connect Securities are subject to a general price limit of $\pm 10\%$ based on the previous Trading Day's closing price (and $\pm 5\%$ for stocks under risk alert). The price limit may be changed from time to time. All orders in respect of China Connect Securities must be within the price limit. Any orders with a price beyond the price limit are rejected by the relevant China Connect Market Operator.

28. Dynamic price check

To prevent mischievous behaviour towards the use of the Daily Quota, SEHK has put in place a dynamic price checking for buy orders. Buy orders with input prices lower than the current best bid (or the last traded price in the absence of current best bid, or the previous closing price in the absence of both current best bid and last traded price) beyond a prescribed percentage will be rejected.

During the opening call auction session, the current bid (or the previous closing price in the absence of the current bid) will be used for checking. During the closing call auction of SZSE, the current bid (or last traded price in the absence of the current bid) will be used for checking. Dynamic price checking will be applied throughout each Trading Day, from the 5-minute input period before the start of an opening call auction session until market close of the China Connect Market. SEHK has set the dynamic price checking at 3% during the initial phase of Stock Connect. Such price checking percentage may be adjusted from time to time subject to market conditions.

29. Restrictions on selling China Connect Securities

Investors are prohibited from using China Connect Securities purchased through Stock Connect to settle any sell orders placed through channels other than Stock Connect. Accordingly, there may be a limited market and/or lower liquidity for China Connect Securities purchased through Stock Connect (as compared to the same shares purchased through other channels).

In addition, there are restrictions on any entitlement security received by the Client in respect of China Connect Securities. If such entitlement securities are in the form of Special China Connect Securities, they are only eligible for sale through Stock Connect (i.e. they cannot be purchased by other parties through Stock Connect). If such entitlement securities are not in the form of Special China Connect Securities, they are not eligible for trading through Stock Connect (i.e. they are only available for trading in the relevant stock market in Mainland China). Accordingly, there is a risk of low (or no) liquidity for such shares received by way of entitlement.

If China Connect Securities involve odd lots, they cannot be purchased through Stock Connect. A sale of China Connect Securities involving odd lots is allowed if the sale order of such China Connect securities relates to the sale of all, but not part, of the odd lots held in respect of such China Connect Securities. It is common that a board lot buy order may be matched with different odd lot sell orders, resulting in odd lot trades. Accordingly, there may be a limited market and/or lower liquidity for China Connect Securities involving odd lots purchased through Stock Connect.

30. Taxation

China Connect Securities traded under Stock Connect currently enjoy a temporary exemption from Mainland Chinese capital gain tax and Mainland Chinese business tax. It is uncertain when such exemptions will expire and whether other Mainland Chinese Taxes will be applicable to trading of China Connect Securities under Stock Connect. Dividends derived from China Connect Securities are subject to Mainland Chinese withholding tax. Mainland Chinese stamp duty is also payable for transactions in China Connect Securities under

Stock Connect. The Client is fully responsible for any Taxes in respect of China Connect Securities, and agrees to indemnify Galaxy International Securities on demand from and against all Taxes which Galaxy International Securities may incur or be subject to in connection with any China Connect Securities which the Client holds, trades or otherwise deals in. Neither Galaxy International Securities nor China Galaxy International assumes any responsibility for advising on or handling any tax issues, liabilities and/or obligations in connection with Stock Connect, and neither Galaxy International Securities nor China Galaxy International will provide any service or assistance in this regard. Prior to investing in China Connect Securities, the Client is strongly urged to consult its/his/her own tax advisers with respect to the possible tax consequences to it/him/her of such investment since such tax consequences may differ in respect of different investors.

31. Hong Kong Client Securities Rules

As a general rule, investors participating in Northbound Trading do not enjoy the full protection afforded under the Securities and Futures Ordinance and its related subsidiary legislation. In particular, as the China Connect Securities traded through Stock Connect are not listed or traded on SEHK, the Client will not have protection under the Securities and Futures (Client Securities) Rules made by the SFC under section 148 of the SFO as amended from time to time, unless otherwise specified by the SFC or any other relevant Stock Connect Authority.

32. Investor Compensation Fund

Trading in China Connect Securities does not enjoy the protections afforded by the Investor Compensation Fund established under the Securities and Futures Ordinance. Accordingly, unlike the trading of SEHK-listed securities, the Client will not be covered by the Investor Compensation Fund in respect of any loss it/he/she may sustain by reason of a default by any SFC licensed or registered person.

33. Ownership of China Connect Securities

China Connect Securities are uncertificated and are held by HKSCC for its account holders. Physical deposit and withdrawal of China Connect Securities are not available under the Northbound Trading.

Under current Mainland China regulations, China Connect Securities will be recorded in a nominee account opened by HKSCC with ChinaClear and the Client's title or interests in, and entitlements to, China Connect Securities (whether legal, equitable or otherwise) will be subject to Applicable Requirements, including laws relating to any disclosure of interest requirement or foreign shareholding restriction. This is a complicated area of law and the Client should seek independent professional advice.

34. Disclosure of information and publication of trade information

The SEHK may require Galaxy International Securities to provide information on the Client's profile, and the type and value of its/his/her orders in relation to Northbound Trading of China Connect Securities and the trades which Galaxy International Securities executed for it/him/her, at such intervals and in such form as SEHK may specify from time to time for purposes of the publication, dissemination or public distribution of aggregated information in respect of China Connect Securities trades under Stock Connect, trading volumes, investor profiles and other related data.

35. No manual trade or block trade

There is no manual trade facility or block trade facility for Northbound Trading.

36. Amendment of orders and loss of priority

Consistent with the current practice in Mainland China, if an investor engaged in Northbound Trading wishes to amend an order, the investor must first cancel the original order and then input a new one. Accordingly, order priority will be lost and, subject to the restrictions on the balance of the Daily Quota, any subsequent order may not be filled on the same Trading Day.

37. Difference in Trading Day

Stock Connect is open for trading only when (a) each of HKEx and the relevant China Connect Market is open for trading; and (b) banking services are available in both Hong Kong and Mainland China on the corresponding money settlement days. If any of the exchanges is not open or if the banks in either Hong Kong or Mainland China are not open for money settlement business, the Client will not be able to conduct any Northbound Trading. The Client should take note of the days on which the Stock Connect operates and decide according to its/his/her own risk tolerance capability whether or not to take on the risk of price fluctuations in China Connect Securities during the time when the Stock Connect is not available for Northbound Trading.

38. Operational hours

SEHK has absolute discretion to determine from time to time the operational hours of the Stock Connect, and will have absolute

discretion to change the operational hours and arrangements of the Stock Connect at any time and without advance notice whether on a temporary basis or otherwise. Neither Galaxy International Securities nor China Galaxy International shall be under any obligation to inform the Client of any such determinations by SEHK as to the operational hours of the Stock Connect. The Client should be aware of the risk of price fluctuations in China Connect Securities during the time when the Stock Connect is not available for Northbound Trading.

39. Risk of ChinaClear default

ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. Pursuant to the General Rules of CCASS, if ChinaClear (as the host central counterparty) defaults, HKSCC may, in good faith, seek recovery of the outstanding China Connect Securities and monies from ChinaClear through available legal channels and through ChinaClear's liquidation process, if applicable. HKSCC will in turn distribute the China Connect Securities and/or monies recovered to clearing participants on a pro-rata basis as prescribed by the relevant Stock Connect Authorities. Galaxy International Securities in turn will be distributing China Connect Securities and/or monies only to the extent recovered directly or indirectly from HKSCC. Although the likelihood of a default by ChinaClear is considered to be remote, the Client should be aware of this arrangement and of this potential exposure before engaging in Northbound Trading.

40. Risk of HKSCC default

Galaxy International Securities' ability to provide the services under this Supplement is subject to the due performance by HKSCC of its obligations. Any action or inaction of the HKSCC or a failure or delay by the HKSCC in the performance of its obligations may result in a failure of settlement, or the loss, of China Connect Securities and/or monies in connection with them and the Client may suffer losses as a result. Neither Galaxy International Securities nor China Galaxy International is responsible or liable for any such losses.

41. Company announcements on corporate actions

Any corporate action in respect of China Connect Securities is announced by the relevant issuer through the relevant China Connect Market Operator's website and certain officially appointed newspapers. HKSCC also records all corporate actions relating to China Connect Securities in CCASS and informs its clearing participants of the details via the CCASS terminals as soon as practicable on the announcement date. Investors engaged in Northbound Trading may refer to the relevant China Connect Market Operator's website and the relevant newspapers for the latest listed company announcements or, alternatively, the HKEx website's China Stock Markets Web (or such other replacement or successor web-page from time to time) for corporate actions in respect of China Connect Securities issued on the previous Trading Day. The Client should note that SSE-listed issuers or SZSE-listed issuers publish corporate documents in Chinese only, without any official English translation.

In addition, pursuant to the General Rules of CCASS, HKSCC endeavours to collect and distribute cash dividends relating to China Connect Securities to clearing participants in a timely manner. Upon receipt of the dividend amount, HKSCC will arrange to distribute it to the relevant clearing participants on the same day, to the extent practicable.

Following existing market practice in Mainland China, investors engaged in Northbound Trading are not entitled to attend shareholder meetings by proxy or in person, unlike the current practice in Hong Kong in respect of SEHK-listed shares.

Galaxy International Securities does not verify or warrant the accuracy, reliability or timeliness of any company announcements of corporate actions, and neither Galaxy International Securities nor China Galaxy International accepts any liability (whether in tort or contract or otherwise) for any Loss arising from any errors, inaccuracies, delays or omissions or any actions taken in reliance thereon. Galaxy International Securities expressly disclaims all warranties, expressed or implied, as to the accuracy of any company announcement or as to the fitness of the information for any purpose.

42. Rights issuance

Where the Client receives shares or other types of securities from an issuer of a China Connect Security as entitlements, the Client should note that the Client may not be able to buy or sell such entitlement security through the Stock Connect in certain circumstances (for example, if such entitlement security is listed on a China Connect Market but is not traded in RMB or if such entitlement security is not listed on a China Connect Market).

43. General market risks associated with investing in China Connect Securities

Investing in China Connect Securities involves special considerations and risks, including without limitation greater price volatility, less developed regulatory and legal framework, economic, and social and political instability of the stock market in Mainland China. The Client should also note that the China Connect Market Operator's trading rules, listing rules, and other applicable laws and regulations may be published in Chinese only, without any official English translation.

44. Risks associated with trading of ChiNext Shares

The trading of ChiNext Shares is subject to the risks associated with the SZSE ChiNext market, including but not limited to such risks arising from the following: (a) volatility and overvaluation of the share prices; (b) the less stringent requirements on profitability and share capital of the ChiNext market (compared to the main board markets in Mainland China); (c) given the technological focus of the companies listed on the ChiNext market, such companies are more susceptible to technical failures in their respective business areas; and (d) conventional valuation methods may not be entirely applicable to companies listed on the ChiNext market due to the high-risk nature of the relevant industries.

Only Institutional Professional Investors are allowed to place orders with Galaxy International Securities to buy or sell ChiNext Shares which are accepted as China Connect Securities (other than Special China Connect Securities which are eligible for sell orders only) through the use of Stock Connect.

45. Warning statements and termination of service

Galaxy International Securities may be required by SEHK and/or a China Connect Market Operator to issue to the Client, either verbally or in writing, a warning statement and terminate the provision of Northbound Trading services to the Client for a period which SEHK and/or the China Connect Market Operator may prescribe.

46. Novelty of Stock Connect

Stock Connect is an unprecedented scheme launched jointly between the China Connect Market Operators and HKEx to facilitate cross-border trading of China Connect Securities through HKEx. Trading in China Connect Securities under Northbound Trading is subject to all Applicable Requirements. Any change in the Applicable Requirements may have an adverse impact on the trading of China Connect Securities. Such impact may adversely affect the Client's investment in China Connect Securities. In the worst case scenario, the Client may lose a substantial part of its/his/her investments in China Connect Securities under Stock Connect.

Galaxy International Securities provides trading services based on the Stock Connect market system which is operated by the relevant China Connect Market Operator. Galaxy International Securities is not responsible for any delay or failure caused by the Stock Connect market system and investors accept all risks arising from trading China Connect Securities through the Stock Connect market system. Neither Galaxy International Securities nor China Galaxy International shall be responsible or held liable for any loss or damage directly or indirectly suffered by the Client arising from or in connection with the Stock Connect or the China stock connect system for receiving and routing Stock Connect orders to a Stock Connect market system for automatic matching and execution, through Northbound Trading.

47. Margin trading

Subject to certain conditions prescribed by the Stock Connect Authorities, Hong Kong and overseas investors may conduct margin trading in China Connect Securities determined by the relevant Stock Connect Authorities to be eligible for margin trading ("Eligible Margin Trading Securities"). HKEx will from time to time publish a list of Eligible Margin Trading Securities. Each of the China Connect Market Operators may suspend margin trading activities in any specific A Share if the volume of margin trading activities in such A Share exceeds a threshold determined by such China Connect Market Operator and resume margin trading activities when the volume of margin trading activities drops below a prescribed threshold. Where SEHK is notified by a China Connect Market Operator that a suspension or resumption involves a security on the list of Eligible Margin Trading Securities, HKEx will disclose such information on its website. In such circumstances, any margin trading in the relevant China Connect Security shall be suspended and/or resumed accordingly. Each of the China Connect Market Operators has reserved the right to require margin trading orders to be flagged as margin trading orders when routed to Stock Connect. Neither Galaxy International Securities nor China Galaxy International shall have any obligation to update you in respect of the list of Eligible Margin Trading Securities or any restrictions or suspensions in respect of margin trading from time to time.

48. Limits on Short Selling

Hong Kong and overseas investors are currently prohibited from naked Short Selling China Connect Securities.

Covered Short Selling of China Connect Securities is permitted subject to certain requirements in the Stock Connect Rules. However, Galaxy International Securities will not facilitate covered Short Selling of China Connect Securities and/or any Uptick Long Sale. The Client shall be fully responsible for understanding and complying with the Short Selling requirements in effect from time to time and for any consequences of non-compliance.

49. Stock Borrowing and Lending

Stock borrowing and lending are permitted for the eligible China Connect Securities as specified by the China Connect Market Operators for the purposes of (a) covered short selling, (b) satisfying the Pre-Trade Checking requirement and (c) in any other circumstances as SEHK or the China Connect Market Operators may specify from time to time. The China Connect Market Operators will determine a list of eligible China Connect Securities for stock borrowing and lending. Stock borrowing and lending of eligible China Connect Securities will be subject to restrictions set by SEHK and the China Connect Market Operators, including but not limited to the following:

- (a) stock borrowing and lending agreements for the purpose of covered short selling shall have a duration of not more than one month;
- (b) stock borrowing and lending agreements for the purpose of satisfying the Pre-Trade Checking requirement shall have a duration of not more than one day (and roll-over is not permitted);
- (c) stock lending will be restricted to certain types of persons to be determined by the China Connect Market Operators; and
- (d) stock borrowing and lending activities will be required to be reported to SEHK.

Only certain persons are eligible to lend China Connect Securities in stock borrowing and lending arrangements concerning China Connect Securities.

Galaxy International Securities will be required to file a monthly report to SEHK providing details of its stock borrowing and lending activities with respect to China Connect Securities. This may include (amongst others) details of the borrower, lender, amount of shares borrowed/lent, amount of shares outstanding and date of borrowing/returning.

The Client should refer to the relevant provisions from time to time governing stock borrowing and lending of China Connect Securities under the Applicable Requirements. Neither Galaxy International Securities nor China Galaxy International shall have any obligation to update the Client in respect of any change to the relevant Applicable Requirements.

50. Risks associated with the Circuit Breaker mechanism

The execution of trades in China Connect Securities is subject to the Stock Connect Rules including the Circuit Breaker Provisions. Imposition of a Circuit Breaker on any China Connect Market Trading Day will result in the suspension of the execution of trades through the China Connect Market system for such period or periods as set out in the Circuit Breaker Provisions. Further, the lifting of a Circuit Breaker during a continuous auction session of any China Connect Market Trading Day may result in trades being executed through call auction.

Unless otherwise determined by the SEHK, where the Circuit Breaker Provisions allow orders in respect of China Connect Securities to be cancelled during the period when a Circuit Breaker is in effect, Galaxy International Securities may input order cancellation requests through the Stock Connect during such period as usual.

Notwithstanding this, no Stock Connect order is regarded as cancelled unless and until a cancellation confirmation has been issued by the relevant China Connect Market system, and neither the SEHK nor its subsidiaries shall have any liability in the event that a Stock Connect order which Galaxy International Securities has required to be cancelled is not cancelled for any reason whatsoever.

51. Provision of Client Identification Data

For Northbound Trading, from the Investor ID Model Effective Date, the Client is required to provide Client Identification Data and keep such information updated for the Stock Connect Authorities to collect the Northbound Trading investors identification information and to track their trade orders on a real-time basis. It is the Client's obligation to keep the Client Identification Data accurate and up-to-date.

The Client cannot place a trade order until the completion of account opening and/or successful update of its CID from Galaxy International Securities. Notwithstanding that the Client has submitted its CID, a trade order of the Client may still be rejected if the CID provided by Client and BCAN have not yet been submitted to and/or approved by SEHK, the China Connect Market Operator or other Stock Connect Authorities at the time of such trade order, and Galaxy International Securities shall not be liable to the Client for any failure or delay in submitting such CID and BCAN to SEHK, the China Connect Market Operator or other Stock Connect Authorities. If the Client is an individual client, and does not provide the necessary consents and authorizations (both written and prescribed) in relation to the collection, storage, use, disclosure and transfer of his or her CID and/or BCAN, or the Client's BCAN or BCAN-CID mapping are otherwise invalid or deficient, Galaxy International Securities may, in its own discretion, place Northbound Trading sell orders in relation to such BCAN, but no Northbound Trading buy order is allowed in relation to such BCAN. If abnormal trading activities are identified in respect of the Client by the China Connect Market Operators, the China Connect Market Operators may in its discretion suspend trading with the Client or take such other actions as permitted by Stock Connect Rules, any applicable regulations and laws against the Client. The Client is liable for any Loss incurred in connection with any such actions taken by SEHK, the China Connect Market Operator, or other Stock Connect Authorities.

52. Acknowledgement

The Client acknowledges and accepts that since Galaxy International Securities does not provide any Short Selling or Stock Borrowing and Lending services in respect of the China Connect Securities, relevant clauses in the Terms and Conditions (including but not limited to clauses 36 and 37 of this Supplement) do not apply.
